TIME IS MONEY

Do you spend your time and money managing rental properties or selling homes?

If you do, then you know that sparkling floors and spot free carpets truly increase your ability to rent or sell a property.

Are new floor coverings always the answer?

No! Think about it. In addition to paying the high costs of materials, you must also find skilled and dependable installers. And waiting for materials or labor could keep your property off the market for precious weeks -- or even months.

Fortunately, in the hands of a true professional, almost all existing floor coverings can be restored to excellent condition at a fraction of the cost and time of installing new.

Before You Spend Your Precious Time and Money...

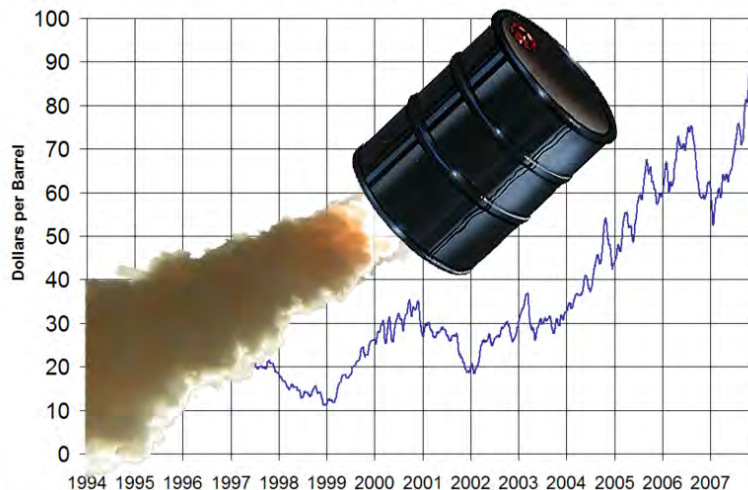

Call Us! We are experts in making carpets and floors look nearly new. We get the job done fast and make your property a priority. We can speed up the sales process and save you or your client thousands in replacement costs.

We can and will help you close the sale or rent the unit! Let us help you stage your properties. You won't regret it!

Costs of Petroleum Based Products on the Rise!

Oil Prices, 1994-2007

NYMEX Light Sweet

"Yes, carpet prices are going up again in February of 2008, and yes they went up in June of 2007. Yes they went up in April 2005, but costs keep increasing. Times may be tough, but that is not stopping the mills from raising their prices eleven times in 19 months. This February's price increases will not be the last. This is not unexpected due to rising health care costs, fuel cost, (\$98/barrel), the lingering effects of Katrina etc., and the fact that there is less and less competition in the making of carpet."
